

MOVING PLASTICS RECYCLING FROM 30 TO 100%

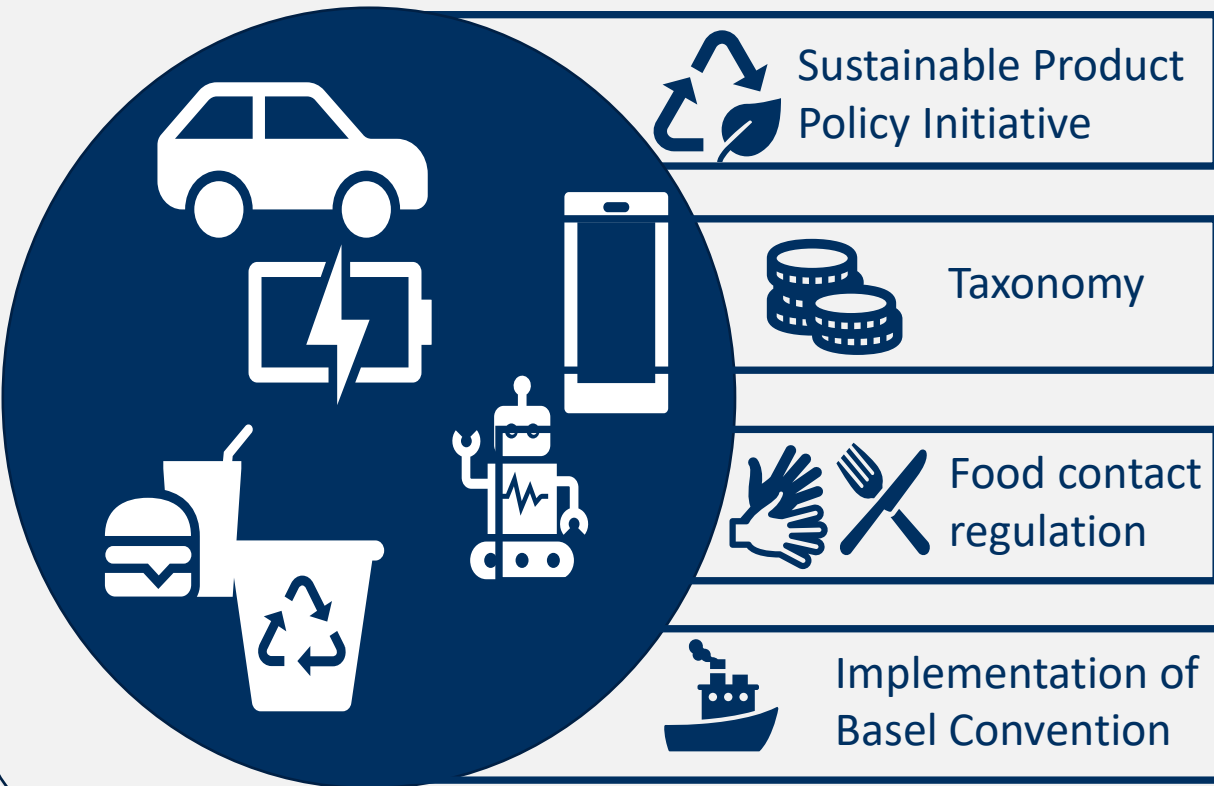

The case of chemical recycling

Tuesday, 13 March 2021

Moving plastics to circularity – The case of chemical recycling

Circular plastics objective in range of policy dossiers (2021 – 2022)

Supportive policy framework

Different technology requirements

- Complementary option to build value cycles
- Neutral recycling definition; future reference in Art. 17 (3) WFD

Environmental integrity & value chain integration

- LCA & transparency on environmental performance crucial to ensure Green Deal and CE objectives
- Certified mass balancing for value chain integration

Waste access

- Intra EU harmonized approach for waste shipment
- Synergies by better sorting to build pure & clean waste streams
